Everyday use of the Nomad drifter

Turning on the drifter

1. Unscrew cap from the floater.

2. Disconnect the dummy plug (this will automatically switch on the drifter) and set the rubber protection in place.

3. Screw cap firmly onto floater, hand tight, ensuring proper seating of the gasket around its entire circumference.

4. The buoy is now ready for deployment. Please confirm proper communications through the web application: http://ldmanager.southteksl.com

5. To switch off the drifter just connect the dummy plug.

Charging the internal battery

6. Plug the charger.

The status light on the charger indicates charging status (red charging, green charged).

Once the internal battery has finished charging, the NOMAD is ready for use.

The LiPo batteries are sent at 40% of capacity. Fully charge the batteries before deployment.

Caution!

Users of Lithium polymer (LiPo) batteries should take extreme care when handling such batteries. Legislation regarding disposal of LiPo batteries vary from country to country.

Key features

· **Cost-effective drifter**

· **Offshore applications**

· **User friendly software**

· **Robust, precise and handy**

· **GPS, GLONASS and GALILEO tracking**

· **Global Iridium bidirectional communication**

· **Flexible deployment: from an infratable boat to an aircraft carrier**

· **Continuous working mode up to several months depending on user configured intervals for transmission and position sampling**

SouthTEK Sensing Technologies S.L. is not responsible for any direct or indirect damages resulting from the use of these devices

Specifications

1. Cap
2. Floater
3. Drogue attachment eye
4. Gasket
5. Antenna GPS/Iridium
6. Charge connector
7. LED indicator
8. Electronic device
9. Battery
10. Ballast

Iridium	Frequency range 1616 MHz to 1626.5 MHz
SBD	Duplexing method TDD
GNSS	Receiver 32 channels GPS/GALILEO/SBAS: L1 1575.42 MHz GLONASS: L1 1597.5 MHz Accuracy position 5 m Hot start < 3.5 sec Warm start < 33 sec Cold start < 34 sec
Proccesor	ARM Core
Memory	1.7MB (RAM) and 8 MB (Flash)
Battery	Lithium polymer (LiPo) Capacity standard 20400 mAh Nominal = 3.7V
Antennas	Iridium: 2 dBi GNSS: 2.5 dBi
Charging conditions	DC 4.2V 2A max
Dimensions	72 cm x 22 cm x 22 cm
Weight	2900 gr

LED Indicators

🟢 Started (Running or idle mode).

🟡 Searching (GNSS and comm. signals).

🔴 Error (Device anormal functionality).

LED indicatos.

For a detailed description of led flashing pattern, please refer to Application Note #202 at

4
Configure device

- ⚙ Configure device
- ⚙ Config change in process (with motion)
- ⚙ Error changing config

Battery life will depend on GSM coverage and sampling/transfer interval.

Configure device — Save / Cancel

Schedule
Sample interval: 5 minutes
Transfer interval: 10 minutes

Device info
Id: LCA00075
IMEI: 353438060331662
Model: Coastal NOMAD-B
Top-up date: 2015-04-01
Device status: Online

Current config
Sample interval: 5 minutes
Transfer interval: 10 minutes

Schedule tab panes:
Choose the Sample interval and Transfer interval. Click on the SAVE buttom to save the configuration.

---

5 Search mode

SEARCH MODE can be activated or deactivated through LD Manager (below figure) or sent by e-mail (right figure). It becomes operational after the first connection with the drifter.

SEARCH MODE transfers the drifter position via email every five minutes (default) or other user-defined interval.

Search mode — Apply / Deny / Cancel
Schedule
Id: LCA00018
Sample interval: 5 minutes
Recipient email:

Activation/deactivation SEARCH MODE through LDManager:

Activate SEARCH MODE to recover easily the drifter including the recipient email and click on Apply button.
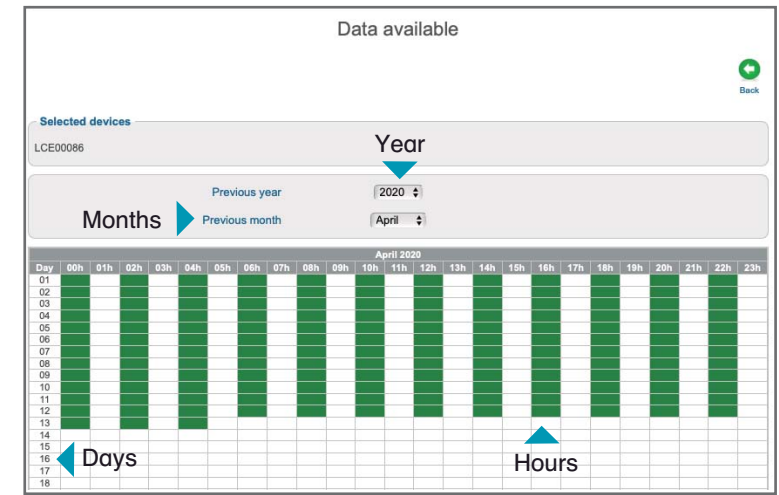

Deactivate SEACH MODE clicking on Deny button.

Activation/deactivation SEARCH MODE from e-mail:

Send an e-mail to: config@ldmanager.southteksl.com

To activate -> Message:
search on, DRIFTER ID, PASSWORD, SAMPLE INTERVAL* (in sec)

To deactivate -> Message:
search off, DRIFTER ID, PASSWORD

Send an email
Email Address: search on, LCA00018, 1234, 300
Subject:
Message: config@ldmanager.southteksl.com
